CITY OF WHITE PLAINS ALERTS
COMMUNITY NOTIFICATION SYSTEM

Sign up for...

CODE RED®

Keeping citizens informed.

Dear Residents and Businesses,

White Plains ALERTS is our community notification system. It is powered by CodeRED and is a high speed communication service for emergency notifications as well as important community-related information. The system is a tool for the City to disseminate factual information, provide notification of available resources, or communicate the need to take emergency actions.

CodeRED is capable of contacting residents and businesses via telephone, email and/or text message. The system is programmed to automatically access land line telephone numbers, however I urge you to register your mobile phone numbers and email addresses to ensure that you continue to receive important City messages in the event land line service is interrupted.

Best regards,

Thomas M. Roach, Mayor
